EMERGENCY SERVICES - 911 DIALING

Traditional 911 or E911 Dialing Service. The Service does not support traditional 911 or E911 access to emergency services in all locations. Where we do not offer traditional 911 or E911 access, we offer a feature known as "911 Dialing" which is a limited emergency calling service available only on OHIO.NET DIGITAL PHONE-certified Devices or Equipment. The 911 Dialing feature cannot be used in conjunction with an OHIO.NET DIGITAL PHONE Soft Phone. Our 911 Dialing feature is not automatic; you must separately take affirmative steps, as described in this Agreement, to register the address where you will use the Services in order to activate the 911 Dialing feature. You must do this for each OHIO.NET DIGITAL phone number that you obtain. The 911 Dialing feature of the Service is different in a number of important ways from traditional 911 or E911 service as described on our website page for 911 Dialing under "Features," and below. You shall inform any household residents, guests and other third persons who may be present at the physical location where you utilize the Service of (i) the non-availability of traditional 911 or E911, and (ii) the important differences in and limitations of the OHIO.NET DIGITAL PHONE 911 Dialing feature as compared with traditional 911 or E911 dialing. The documentation that accompanies each Device that you purchase should include a sticker concerning the potential non-availability of traditional 911 or E911 dialing (the "911 Sticker"). It is your responsibility, in accordance with the instructions that accompany each Device, to place the 911 Sticker on each Device that you use with the Service. If you did not receive a 911 Sticker with your Device, or you require additional 911 Stickers, please contact our customer care department at 330-658-2121.

Physical Location For each phone number that you use for the Service, you must register with OHIO.NET DIGITAL PHONE the physical location where you will be using the Service with that phone number. When you move the Device to another location, you must register your new location. If you do not register your new location, any call you make using the 911 Dialing feature may be sent to an emergency center near your old address. You will register your initial location of use when you subscribe to the Service. Thereafter, you may contact us to update your records at 330-658-2121. For purposes of the 911 Dialing feature, you may only register one location at a time for each phone line you use with the Service.

Service Outages Due to Power Failure or Disruption. 911 Dialing does not function in the event of a power failure or disruption. If there is an interruption in the power supply, the Service, including 911 Dialing, will not function until power is restored. Following a power failure or disruption, you may need to reset or reconfigure the Device prior to utilizing the Service, including 911 Dialing.

Service Outages Due to ISP or Broadband Provider Blocking of Ports or Other Acts. Your ISP or broadband provider or other third party may intentionally or inadvertently block the ports over which the Service is provided or otherwise impede the usage of the Service. In that event, provided that you alert us to this situation, we will attempt to work with you to resolve the issue. During the period that the ports are being blocked or your Service is impeded, and unless and until the blocking or impediment is removed or the blocking or impediment is otherwise resolved, your Service, including the 911 Dialing feature, may not function. You acknowledge that OHIO.NET DIGITAL PHONE is not responsible for the blocking of ports by your ISP or broadband provider or any other impediment to your usage of the Service, and any loss of service, including 911 Dialing, that may result. In the event you lose service as a result of blocking of ports or any other impediment to your usage of the Service, you will continue to be responsible for payment of the Service charges unless and until you terminate the Service in accordance with this Agreement.

Other Service Outages. If there is a Service outage for any reason, such outage will prevent all Service, including 911 Dialing, from functioning. Such outages may occur for a variety of reasons, including, but not limited to, those reasons described elsewhere in this Agreement.

SIP TRUNK ADDENDUM TO TERMS OF SERVICE

911 Call Completion. Two-way SIP Trunks also include static 911 services, 411, Operator services, inbound caller id, caller location or white page listing. These services require Customer to provide their own legitimate service address. Only TN's (Outbound Phone Numbers) or Toll-Free TN's provided by Ohio.net, or ported to the Ohio.net network, or numbers identified by the customer can be used in conjunction with this service. Any TN sent to the sip trunks for use in a 911 call is subject to a service charge for each incident.

All special configurations are subject to Ohio.net's approval and Ohio.net reserves the right to terminate this agreement where proper interoperability testing has not been completed when required. Any traffic deemed to jeopardize the integrity of Ohio.net's network may be blocked by Ohio.net.

National Call Center service. Customer systems sending a non-registered TN to either E911 or basic 911, emergency calls placed using the digits 9-1-1 will be sent to a national emergency call center. A trained agent at the emergency call center will ask for caller's name, telephone number, and location and then transfer the caller to the appropriate local emergency center or otherwise determine the best way to provide emergency services to the caller. Like Basic 911, the trained operators answering calls in the national call center will not have automatic access to the caller's telephone number, so the caller must be prepared to provide this information.
